A511  
v. 14

## CONTENTS OF VOL. XIV.

### A.

- AGAVE AMERICANA, notice of its use in cordage, 101.  
AGRICULTURAL ADDRESS, by James Merrill, 330.  
— EXCURSION, by the Editor of the Southern Agriculturist, 154. 186. 218. 250.  
— EXHIBITIONS, by R. K. Meade, 402.  
— INTEREST, neglected by newspapers, 129.  
— SOCIETY, reports to the Massachusetts, by M. Allen, 122. By Peter Thacher, 130. Address to the Essex, 170. 178. Report on best cultivated farms, 171. 202. Recommended by R. K. Meade, 212. Berkshire, notice of, 250. Fredericksburg, remarks on the address to, 305, 306.  
— PAPER, a new one proposed in Lower Virginia, 243.  
AGRICULTURE, on the improvement of southern, 4. In Virginia, 76. State of, 187. State of, in Alabama, 217. By Gov. Marcy, 361. Fireside reflections on, 410.  
AITON, Wm. on perpetual pastures, 203.  
ALABAMA, state of Agriculture in, 217.  
ALFALFA, or Spanish clover, lucerne, 108. Sent by Philo White, 153. By the Editor, 161.  
ALLEGANY COUNTY, Md. brief notice of, 311.  
ALLEN, Rev. Morrell, on the mixture of soils, 234.  
AMARYLLIS FORMOSSISSIMO, notice of, 81.  
AMERICA, an English work, notice of, 189.  
AMERICAN BLIGHT, by Robert Camell, 31.  
AMERICAN FARMER, notice of, 137. Removal of the office, 241. Improvements in, suggested, 242. Close of the fourteenth volume, 409.  
AMERICAN FLOWER GARDEN DIRECTORY, notice of, 73. 341.  
ANGORA CATS, described by Com. Porter, 145.  
ANEMONES, remarks on, by D. T. 277.  
ANTS, method of destroying, 33. 127. 175.  
APPLE DUMPLINGS, how to make, 393.  
APPLES, how to preserve, 289. Remarkable bunch of, 321. A large one, 327.  
ARACACHA, notice of the Editor's experiment with, 1. Result of an attempt to cultivate, by the Editor of the Southern Agriculturist, 5. Notice of the Editor's experiments, with remarks on Mr. Lowell's article, 185. Some notice of, and the efforts, to introduce it, 191.  
ARROW ROOT, Otaheitean method of preparing, 343.  
ARTICHOKE, Jerusalem, 227.  
ASHES, and lime, good top dressing, 76. Leached, for manure, 99. And soot, good for turnips, 189.  
ASPARAGUS, cultivation of, 113. By R. Sinclair, 385.  
AUGUST, remarks on the month of, from Howitt's Book of the Seasons, 215.  
AUTUMNAL FRUITS, why more crude than summer, 157.

### B.

- BACON, curing, recipe for, 198. Preservation of, 238.  
BAHOCA, (bejuco), vegetable curiosity of Cuba, 217.  
BAKED BEANS, recipe for, 207.  
BARBERRY, its fruit makes good rob, and its character, 398.  
BARCLAY, J. T. on the culture of silk, 165.  
BARKING the stems of fruit trees, 31.  
BARLEY, why freed of its bran, 215. And peas, culture of, 282. Culture, two crops of, in Maryland, 369.  
BARN, a cheap and economical one, 79.

- BARNITZ, C. A. his account of the beef of the Durham Shorthorn cow Ruby, 41.  
BAYBERRY, or wax-bearing myrtle, notice of, 222.  
BEDFORD breed of hogs, 182.  
BEDROOMS, why flowers should not be kept in, 229.  
BEE, hives in garrets, 55. Moth, best method of destroying, 245. 282. 343.  
BEEF, Durham Shorthorn, by C. A. Barnitz, 41. Market in New York, 143. Sales of, in Massachusetts, 281.  
BEER, hop, how to make, 39.  
BEES, curious fact in their economy, 57. Injured by the winter, 87. Time of swarming, 137. Sting of, 199. Destruction of, by toads, 271. Management of, 318. Cultivation of, 361. 365. Remarks on, 391.  
BEE CATCHER, or king bird, 169.  
BEETS, red, for horses and cattle, 110. Amber, sugar made from, 292. Remarkable one, 321.  
BIRD, the largest in the world, 207.  
BIRDS, destruction of, 7.  
BLACK, how to color, 405.  
BLACKHEAD, in wheat, 113.  
BLIGHT, American, in trees, by Robert Camell, 31.  
BLINDNESS, in horses, by R. R. Harden, 14.  
BLIND STAGGERS, in hogs and horses, by R. R. Harden, 134. By J. C. Robertson, 191.  
BOTANICAL NAMES, their propriety, 17.  
BOTANY, Domestic, of the District of Columbia, 65.  
BOTS IN HORSES, by J. Dickinson, 4. By John Smith, 38. Prevention of, 271. By R. R. Harden, 284. Remarks on, 305.  
BOX WOOD, used in Paris for making beer, 95.  
BRAZILIAN FRUIT, notice of, 118.  
BREAD, economical, 182. A substitute for milk in making, 207. Brown, 207. To make good wheat, 393.  
BREEDING principles in animals, 273.  
BUCKINGHAM FARMER, reflections on agriculture by, 410.  
BUDDING, or inoculation, of fruit trees, 197.  
BUEL, Judge, evening at his house, 49.  
BUFFALO BERRY, the yellow, seeds of, received from Major Sanford by the Editor, 25. Description of, 289. Inquiry, 373.  
BUGS, on vines, inquiry for a remedy for, 89. In peas, 118. To destroy, 125. Boxes to prevent, 295.  
BUSHES, eradication of, 181.  
BUTTER, suggestion in making, 62. Its manufacture at Judge Buel's, 64. Making and curing, 90. To preserve, 134. And cheese, report on, at Brighton, 275. New mode of making, 327. Difference of, on different farms, 334.  
BUTTER TREE, of Africa, 357.

### C.

- CABBAGE, why considered wholesome, 262.  
CABBAGE TREE, of Lapland, 125.  
CABELL, N. F. on the Cunningham and Woodson grapes, 325.  
CAKE, fancy, how to make, 334.  
CALCARIOUS MANURES, notice of Ruffin's Treatise on, 113. Extract from, 114. Notice of, 115.  
CALF, a fine one belonging to the Editor, 165. Recipe for fattening—a quiz, 193.  
CALOPOGON PULCHELLA, a beautiful native flower, 129.

- CALORIC, experiments on, 393.  
CALVES, troubled with looseness, 169. Feeding for veal, 206.  
CARAVANZAS, chick-peas, sent by P. White, 153. By the Editor, 161.  
CARNATION, culture of, 294.  
CARR, Robert, presents petre pears, 241.  
CARROTS, the blood, the best variety, 185. Their value for stock, 396.  
CARROT-SHOW, Burnopfield, 373.  
CASTOR OIL, improvement in making, 246.  
CATAWBA GRAPES, presented by R. Sinclair, 241.  
CATTLE, on training, 7. Prize, in England, 15. Feeding, 54. Smithfield cattle show, 94. Feeding, 119. Durham Shorthorn, letter of R. K. Meade, and report of committee, with remarks by R. K. Meade, 162. Feeding, 297. Salt for, 233. Hoven in, recipe for, 238. Fine, in Chester county, 247. Disease in, at Kipp's Bay, 279. In England, 327. On watering, 350. Feeding, 375.  
CATTLE SHOW, Brighton, report of, 274. Report of the Middlesex, 333. Of the Worcester, 343.  
CATTLE YARDS, construction and management of, 197.  
CATS, Angora, described by Com. Porter, 145. Hybrid, by N. Herbemont, 238.  
CAULIFLOWERS, notice and culture of, 332.  
CELESTY, cultivation of, 130.  
CEMENT, fire proof, French mode of making, 89.  
CHARACTER, letters of, remarks on, 385.  
CHEAT, or chess, on its being the offspring of injured wheat, by J. Dickinson, 4. By Thomas Rowan, 4. By N. Herbemont, 26. By a Gleaner, 35. By Middle Virginia, 36. What is cheat or chess, by David Thomas, 42. By E. R. 45. By the Editor, 57. By Dr. Muse, 58. By R. K. Meade, 67. By the Editor, 81. By R. R. Harden, 82. By the Editor, 89. By a Gleaner, 92. By a Gleaner, 116. By the Editor, 121. By J. H. Craven, 123. By E. R. 124. And darnel, by the Editor, 137. By T. Emory, 140. By J. F. Conway, 164. By Rufus McIntire, 188. From the Genesee Farmer, 212. Method of destroying, 226. And darnel, by Fair Play, 242. By B. with remarks by the Editor, 243. Premium offered for proof of, 244. By the Editor, 249. And darnel, by E. R. 274. By Senex, 276. By the Editor, 289. By Gouv. Ogden, 290. By David Thomas, 290. Remarks on, 341. 386. 396.  
CHEESE, Stilton, how to make, 86. Cheese making, 98. At the Brighton show, 275.  
CHEMISTRY, agricultural and horticultural, 348.  
CHENOPodium QUINOA, a new and delicious spi-nage, 89.  
CHESS, see cheat.  
CHESTNUTS, experiments in planting and cultivating for timber, 327.  
CHICKENS, hatched by the cock in Mexico, 262. Hatching, artificially, 383.  
CHICK-PEAS, cicer arietinum, a delicious article, 185.  
CHINESE MULBERRY, new, *morus multicaulis*, 81. 105.  
CHLORINE GAS, its disinfecting power, and how to make, 111.  
CHOKING, of cattle, with turnips, &c. remedy for, 31.  
CHOLERA, notice of, 129.  
CHRYSAETHMUM INDICUM, on its cultivation, 214.

**CHRYSOMELA VITIVORA**, its depredations on the vine, and an experiment with, by D. T. 191.  
**CIDER**, to make artificial, 14. Remarks on the manufacture of, 298.  
**CITRON**, artificial, recipe for preparing, by Miss Barnitz, 191. Melons, to preserve, 334.  
**CLAY**, Henry, on the culture of hemp, 362.  
**CLOVER**, remarks on the culture of red and white, 146.  
**CLOVER RICKS**, by Jacob Hollingsworth, 116.  
**CLOVER SEED**, on raising, 340.  
**COCOONS**, silk, exhibited at New York, by Miss Parmentier, 270. Color of, not attributable to the food, 357.  
**COLMAN**, Henry, his address to the Essex Agricultural society, 170. 178.  
**COLOMBIA**, extracts from Hamilton's Travels in, 405.  
**COMET**, notice of Belias, 319.  
**COMPOST**, for pots, how to make, 89.  
**CONVOLVULUS**, dwarf, notice of, 137.  
**CORK TREE**, stock of, presented by General Forman, 169.  
**CORN**, new mode of cultivating, by J. and M. Pratt, 9. Harvesting, 12. Cultivation of, 36. Use of plaster on, 49. Sleeping in copperas water, 59. Culture of, 66. Planting of, 75. A fine variety of green, 185. Extracts from Gerard on, 227. Red cob of Pennsylvania, 143. Large ear, 262. And potatoes, culture of, 283. Stalks, with seven ears, presented by C. T. Maddox, with remarks by the Editor, 297. Peculiarity of, in new land in Ohio, 329. Culture of, by A. B. Megginson, 356. Culture of, in Tennessee, 379. Culture of, with the plough, 394. Premium crops of, 395. Rhyme on planting, 113. Its native country, 134. Singular fact, in relation to, 193. Culture of, 411.  
**CORN STALKS**, on cutting, 12. Cutting, 196.  
**COTTAGE FLOWER GARDEN**, notices of flowers, 81. 97. 129. 137. 177.  
**COTTON**, amount annually imported into Providence, 59. Time of planting, 220. Georgia and Alabama crops, 291. Picking, in North Carolina, 295. Culture of, in Mississippi, 324. New species of, 349. Of Peru, by Philo White, 369. Rust in, 378. Culture of, Tennessee, 379. Naked seeded, 401.  
**COW**, the Devon, notice of her death, 121.  
**COWS**, improved, notice of, 121. Fine milch, 207. Durham, 207. Management of, 223. A fine one, 335.  
**COW PEAS**, culture of, by W. G. Read, 229.  
**COW WASH**, advantage in using, 332.  
**CRANBERRY**, cultivation of, 119. May be preserved many years, 207.  
**CROPS**, rotation of, 244. To raise three, from one ploughing, 340. Adapting to the soil, 364.  
**CUCUMBERS**, new method of raising, 126.  
**CUNNINGHAM**, and Woodson grapes, presented by Dr. Norton, 257. By N. F. Cabell, 325.  
**CURCULIO**, its habits, 94. By D. Thomas, 125.  
**CURDS**, and whey, how to make, 335.  
**CURRENT**, splendid new species, 197.  
**CUTTINGS**, culture of annuals by, 294.  
**CYPRESS TREE**, a magnificent one, 38.  
**CYPRIPEDIUM**, the various species, by D. T. 174.

## D.

**DAHLIA**, remarks on, by the Editor, 177. 225. Sketch of its history, 269. 277. Exhibited in New York, 270. Presented to the N. Y. Commercial, 281. Varieties of, 300. 308.  
**DAIRY**, from the Library of Agricultural and Horticultural Knowledge, 90. 99.  
**DARNEL**, a specimen sent to the Editor by E. R. 124. And Cheat, by the Editor, 137. By T. Emory, 140. By Fair Play, 242. And Cheat, by R. 274.  
**DEVON COW**, death of a fine one, 121. Cattle, sale of, 233.  
**DIALOGUE**, between a city officer and a horticulturist, 413.  
**DICKINSON**, John, on Cheat, 4.  
**DIOECIOUS PLANTS**, remarks on, 273.  
**DISEASES** in horses, 23. In sheep, 31. 39. 54. In hogs and horses, 134.  
**DRAINING wet land**, its importance, 339. 361.  
**DRILL**, and broad cast system, comparative views, 92. Description and drawing of, 308.  
**DROUGHT**, stirring ground in, 129.  
**DUNG**, remarks on, 394.

**DURHAM** Shorthorn beef, presented to the Editor, by Charles A. Barnitz, with the weight, &c. of that of the cow Ruby, 41. Letter on, by R. K. Meade, report of a committee, with remarks, 162.  
**DWARFING** trees, 12.

## E.

**EARTHS**, nature of, 167.  
**EATON**, professor, on the application of geology, as the basis of agriculture, 210.  
**ECONOMY**, habits of, 351.  
**EDITORIAL** head, notice of a change of, 1. — address, on the commencement of the 14th volume, 1. Remarks on the close of do. 409.  
**EGG PLANT**, a large one from Orange farm, 249; another, 257.  
**EGGS**, why used for clarifying, 7. How to preserve, 49.  
**EHRMANN**, C. on American wine, 265.  
**EMORY**, Col. T. on cheat and darnel, 140.  
**EPITHALAMIUM**, by Brainard, 231.  
**ERGOT**, or spurred rye, caution against, 361.  
**EVENING PRIMROSE**, dwarf white, 137.  
**EVENINGS**, coming, lines on, 319.  
**EXCHANGE PAPERS**, proposals to, 289.  
**EXOTIC PLANTS**, various kinds of, by D. T. 222.

## F.

**FALLOW CROPS**, the use of, 387.  
**FALLOWS**, summer, remarks on, 179. Advantage of fallow crops over, 205.  
**FARM**, selection and management of, 347.  
**FARMERS**, Gen. Humphrey's, advice to, 187. Hint to, 356. Hints to, 363. 415.  
**FARMER OF LAGRANGE**, Lafayette, letter from, 353.  
**FARMER**, a complete one, 275. Theoretical and practical, 291.  
**FARMING**, several systems of, by an Eastern Shore Farmer, 34. Profit and expense of, 341.  
**FARMS**, best cultivated, reports on, 122. 130. 202. Size of, 379.  
**FARMS**, size of in New England, 124.  
**FARM SCHOOL**, subscription for establishing one in Boston, 33. Notice of one in North Carolina, 241.  
**FEAST**, Samuel, on the rare or rose tree sent by Com. Porter, 169.  
**FEEDING CATTLE**, 54. 119.  
**FENCES**, a durable one, 265. The cheapest and best, 375. Of pebble stone, how to make, 399.  
**FERN**, why preferable to straw for layers between fruits, 15.  
**FIG**, a cutting produced fruit, 247.  
**FILATURES**, silk, on establishing, 353.  
**FILBERTS**, English, to cultivate, 126.  
**FILTERING STONES**, to purify water, 265.  
**FLAX**, and chess, remarks on, 356.  
**FLIES**, bugs, &c. to destroy, 125. To prevent their teasing horses, 193.  
**FLORICULTURE**, hints on, 103.  
**FLORIDA**, excursion in, 153.  
**FLOUR**, improvement in its manufacture, 295.  
**FLOWER**, the largest, in the world, 207. A remarkable one, with a request for some seeds, 209. A splendid one, 245. Tholpis barbata, 303.  
**FLOWER GARDEN**, site, exposure, &c. 301.  
**FLOWER GARDEN DIRECTORY**, American, notice of, 73. 341.  
**FLOWERS**, wild, remarks on their neglect, 65. Thoughts on flowers, 73. Removing, 125. Interest of, 159. Should not be kept in bedrooms, 229. Exhibition of in New York, 270. Culture of, 302. Kept in cottagers' windows, 335.  
**FLY**, in early sown wheat, 281.  
**FODDER**, cheap, of straw, &c. 334.  
**FOOD**, of plants, remarks on, 287.  
**FORCING** fruits and vegetables, 13. 62.  
**FORMAN**, Gen. T. M. presents stock of the cork tree, 169. On the male maclura, 241.  
**FOUNDER**, in horses, Turkish cure for, 254.  
**FREDERICKSBURG**, agricultural society of, remarks on Mr. Garnett's address to, 305. Mr. Garnett's address to, 306.  
**FROGS**, bull, destroy chickens, 321.  
**FRUITS**, on forcing, 13. New ones received from Col. O'Fallon, 25. Damage to trees by the last winter, 30. Brazilian, 118. Fine gooseberries and cherries, 121. Autumnal, most crude, 157. Amelioration of, 364.

**FRUIT**, stone, worms in, by D. T. 181. Variation of, produced by seed, 397.  
**FRUIT TREES**, destruction of by the winter, 70. Diseased, remedy for, 79. Injured by mice, 85. On planting by the Editor, 241. Canker in, 357. Protecting stems of in spring, 405.  
**FUCIA**, its first introduction, 255.  
**FUNGI**, their natural history, 393.

## G.

**GAMA GRASS**, remarks on, 349.  
**GARDEN**, the, third prize essay, by Calvin, 54. The matrimonial, 407.  
**GARDENS**, robbing them, notice of, 17.  
**GARDENERS**, their business injured by cholera, 247.  
**GARDENING**, at sea, 128.  
**GARDEN SEEDS**, duration of the vegetable principle in, 326. Delay in receiving by the proprietor, 337.  
**GARNETT**, James M. his address before the Fredericksburg agricultural society, 306.  
**GEIGER**, Abraham, on southern agriculture, 4.  
**GENTLEMAN**, a hundred years ago, 49.  
**GEOLOGY**, application of, by Professor Eaton, 210.  
**GINGER**, a cure for heaves in horses, 405.  
**GINGER BEER**, why most refreshing, 215.  
**GINGER NUTS**, how to make, 359.  
**GOOSEBERRIES**, and cherries, presented by I. McKim, Esq. 121. Bottled, 169.  
**GRAFT AND STOCK**, on their reciprocal influence, by Dr. James Mease, 259. By Wm. Prince, 261.  
**GRAFTING**, fruit trees, varieties successfully treated, 30.  
**GRAPES**, culture of in cities, and injury from winter, 201. Notice of a couple of bunches of the sultana, from Dr. Monkur, 217. Garden, culture of, 221. Powell or bland, 233. Catawba, presented by R. Sinclair, 241. Injury to vines, by N. Herbmont, 241. Answer to queries, 244. Isabella, a remarkable vine, 245. Native, Cunningham and Woodson, presented by Dr. Norton, 257. Isabella, wine from, 261. Cunningham and Woodson, by N. F. Cabell, 325. Scuppernong, 345. Mr. Herbmont's essay on, 377. 380. Warrenton, 393.  
**GRAPES**, American, not subject to depredation from the rose bug, by L. U. 9. One grape, notice of, by J. O'Fallon, 25. Native grapes, described, 29. The Isabella, kept till spring, 95. Scuppernong, 129. Description and drawing of, 132. Isabella, a good one, 160.  
**GRASSES**, best adapted to use, &c. 386.  
**GRASS SEED**, remarks on sowing, 27.  
**GREEN-HOUSE PLANTS**, management of, 45.  
**GRISCOM**, S. S. his meteorological table for March, 55. For April, 87. May, 119. June, 150. July, 183. August, 239. September, 247. October, 287. November, 319. On frogs destroying chickens, 321. For December, 359. For January, 399.  
**GUUL AGHADJ**, or rose tree, by Com. Porter, 145. Remarks on, by S. Feast, 169.

## H.

**HAMILTON**, Col. J. P. extracts from his travels in Colombia, 405.  
**HARDEN**, R. R. on blindness in horses, 14. On snake bites, 46. On hexagonal planting, culture of corn, &c. 66. On blind staggers in hogs and horses, 134. Bots in horses, 284.  
**HARD NAMES**, in botany, their propriety, 17.  
**HAY PLANT**, prangos, account of, 257.  
**HEADACHE**, cure for, 383.  
**HEART**, of a sow broken, 33.  
**HEAVES**, in horses, ginger a cure for, 405.  
**HEDGE**, best kinds of, season for setting, age of plants, &c. 29. Best shrubs for, 30. Sweetbrier, 71. Live, for New England, 85.  
**HEDGFORD**, the fine horse purchased in England by Mr. Jackson, 193.  
**HEDYSARUM GYRANS**, notice of, 87.  
**HEMEROCALLIS FLAVA**, notice of, 81.  
**HEIFER**, gives milk before calving, 305.  
**HEMP**, on its culture, 290. By the Editor, 361. By Henry Clay, 362.  
**HEMP**, Sisal, reward for a machine for cleaning, 263. Grows in Georgia, and how to clean, 321.  
**HERBEMONT**, N. on honesty the best policy, 21. On native ornamental plants, 173. On American wine, 233. On a hybrid cat, 238. On injury to grapevines, 241. Essay on wine and grapes, 377. 380. 386.

**HEXAGONAL PLANTING**, by the Editor, 9. By J. F. B. 25. By the Editor, 65. By R. R. Harden, 66.  
**HIBBERT AND BUIST**, on the male maclura, with remarks by the Editor, 225.  
**HICKORY**, cords made from, 321. Bed cords, 358.  
**HINTS TO FARMERS**, by B. 363.  
**HOGS**, made to work in Illinois, 97. Blind staggers in, 134. 191. Bedford breed, 182. On choice of breeds and management, 209. On raising, in Georgia, 223. Improvement in, by R. K. Meade, 253. New food for, by the Shakers, 257. Large one in New England, 350. Parkinson breed—Bedford breed, 373. A great, 415.  
**HOLLYHOCKS**, a substitute for hops, 244.  
**HONESTY IS THE BEST POLICY**, second prize essay on Rural Economy, by N. Herbemont, Esq. 21.  
**HONEY**, large quantity found in a tree, 286. Method of obtaining, 303.  
**HOPS**, culture of 54. 414.  
**HOP BEER**, how to make, 39.  
**HORSES**, bots in, 14. Diseases in, by "Middle Virginia," 23. Bots in, 38. Bots in, by R. R. Harden, 284. Ginger a cure for heaves, 405. Blind staggers in, 134. 191. Hedgford, imported by Mr. Jackson, 193. To prevent being teased by flies, 193. Scouring in, 238. Yellow water in, 238. Turkish cure for founder in, 254. Prevention of bots in, 271.  
**HORSECHESTNUT**, useful in bleaching and washing, 103. For making paste, 169.  
**HORSEADISH**, culture of, 270. 311.  
**HORTICULTURE**, influence of, 281. Of Venice, 294. Experiment in, 294. Improvements in, 318.  
**HORTICULTURAL** matter, excess of, apologized for, 257.  
**HORTICULTURAL SOCIETY**, Pennsylvania, 156. N. York, 166. Of Charleston, address before, 227. 252. Recommended in Baltimore, 257. 277. 283. Address before Society of Monroe Co. 298. Officers of the Maryland, with remarks, 305. Exhibition of the Pennsylvania, 309. The Maryland, offer premiums, 345.  
**HOTBED**, mode of making, 21. Construction of, 302.  
**HOT HOUSES**, heating by hot water, 37. 125. By hot air, 175.  
**HOT WATER**, for heating hot and green houses, 37. 125.  
**HOUSEKEEPING** in Germany, 183.  
**HOVEN**, in cattle, recipe for, 238.  
**HUMPHREYS**, Gen. his advice to young farmers, 187.  
**HYBRIDS**, propagation from, 236. Cat, by N. Herbemont, 238.  
**HYDRANGEA HORTENSIS**, on changing its color, 102.

## I.

**IMPROVEMENT**, of worn out land, extract of letter to R. K. Meade, 26. In the American Farmer, suggested, 242.  
**INDIAN PEAR**, a new fruit, seeds of received by the Editor, from Col. O'Fallon and Major Sanford, 25.  
**INDUSTRY**, advantages of, 225.  
**INFLUENZA**, in Georgia, treatment of, 63.  
**INK**, on extracting, from linen, 7. 9. Marking, how to make, 361.  
**INOCULATION**, or budding fruit trees, 197.  
**INSECTS**, to destroy flies, bugs, &c. 125. 167. The crysomela vitivora, 191. Habits of, 198. Soap-suds, an antidote for, 203. In peas, 404.  
**INSTINCT**, in sheep, 25. Vegetable, 206.  
**IRON**, preservation of, from rust, 104.  
**IRON PIPE**, how to bend, 72.  
**IRRIGATION**, Dr. Spofford's essay on, 156.  
**ISABELLA GRAPES**, preserved till spring, 95. Their good quality, 169.

## J.

**JACKSON**, Mr. purchases the horse Hedgford, in England, 193.  
**JOHNSON**, C. W. on salt for agricultural purposes, 314. 322.  
**JONNIKIN**, or Johnny cakes, origin of the term, 65.

## K.

**KENRICK'S** new American Orchardist, 356.  
**KEYHOLE CATS**, mystery explained, 145.

## L.

**LAFAYETTE**, letter from, to Mr. Skinner, 353.  
**LAND**, worn out, improvement of, 26.  
**LAYING**, plants, &c. to propagate, 295.  
**LEAVES**, for manure, 276. 297.  
**LEMON JUICE**, why altered by keeping, 215.  
**LEMON SYRUP**, receipt for making, 238.  
**LETTERS**, to be addressed to the publisher, 1. Of character, remarks on, 385.  
**LIGHTNING RODS**, how to put up, 255.  
**LILIES**, remarks on, by D. T. 164.  
**LIME**, its uses as manure, 27. And ashes, as a top dressing, 76. Inquiries relative to, 81. Inquiry how to burn, 193. As manure, by E. Ruffin, 266. As manure, 378.  
**LIME WATER**, for destroying worms, 25. 99.  
**LIVE FENCES**, material for, 29. For New England, 85.  
**LIVERPOOL SALT**, improper for butter, 38.  
**LIVE STOCK**, importance of selecting best breeds, 391.  
**LOCUST**, on the culture and value of, 15. Is the farmers' monitor, 49. Indicates the season of planting, 73. Culture of, 361. Its value and culture, 398.  
**LOOSENING** and pulverizing the soil, 52.  
**LUCERNE**, its value and culture, 52.

## M.

**McCALL**, Thomas, furnishes a table of the weather in Georgia for ten years, 33. On the Warrenton grape, 393.  
**McKIM**, Isaac, presents gooseberries and cherries, 121.  
**MACLURA**, male, letter from Hibbert and Buist on, with remarks by the Editor, 225. Letter from T. M. Forman, 241. Males and females produced from a female, 273.  
**MADDER**, notice of its value as a crop, 121. Directions for raising, 144. Culture of, 220.  
**MALE AND FEMALE PLANTS**, produced from a diœcious plant, 273.  
**MAMMOTH PUMPKINS**, a new kind, 241.  
**MANDRAKE**, or May apple, remarks on, 284.  
**MANGEL WURZEL**, and sugar beet, culture of, &c. 50. 341. 413. Notice of, by the Editor, 185.  
**MANUFACTURES**, of Rhode Island, 103. Domestic, report of the Brighton exhibition, 276.  
**MARKETS**, foreign, 1. 25. 33. 49. 57. 65. 81. 97. 113. 121. 136. 152. 177. 201. 209. 225. 265. 273. 281. 289. 297. New York grain, 273. Foreign, 313. 345. 369. 393. 401.  
**MANURES**, Dr. Hosack's mode of saving, 12. How to save the liquid of stable manure, 28. Plaster of Paris, 51. Straw useful for, 60. Calcareous, Ruffin's Treatise on, 113. Salt, 124. Economical management of farm yard, 211. On saving and managing, 226. Lime as, by E. Ruffin, 266. Leaves for, 276. By J. T. Jones, 291. Collecting, 291. Salt used as, by C. W. Johnson, 314. Importance of, 315. 339. Stable, its nature, and how to preserve, 345. Marsh mud as, 355. Application of, 377. Remarks on, 379. Dung, 394.  
**MARKING INK**, how to make, 361.  
**MARL**, beds of, found in Virginia, 220. 282. By E. Ruffin, 331. Observations on, in reply to Mr. Ruffin, 354.  
**MARSHES**, reclaimed, by John Welles, 259.  
**MARSH MUD**, report on, as manure, 355.  
**MATRIMONIAL GARDEN**, by T. Bridgeman, 407.  
**MAXIM**, an old one contradicted, 303.  
**MEADE**, R. K. on cheat or chess, 67. On Wool, 134. On Durham Shorthorn cattle, 162. Recommends an Agricultural Society, 212. Improvement of Sheep, 245. On the improvement of hogs, 253. On agricultural exhibitions, 402. Death of, 409.  
**MEADOWS**, harrowing, when sward bound, 33. 49. Cleaning, 196.  
**MEASE**, Dr. James, his experiments with the Chinese silkworms, 180. On the reciprocal influence of the stock and graft, 259.  
**MELON**, winter, presented by Mr. Thompson, 329. Extraordinary one, 390.  
**MERRIL**, James, his address, 330.  
**METEOROLOGICAL TABLE**, for March, by S. S. Griscom, 55. For April, 87. For May, 119. For June, 151. For July, 183. For August, 239. For September, 247. For October, 287. For November, 319. For December, 359. For January, 399.

**MICE**, field, how to get rid of, 105. How to destroy, 207. Protection against, 332.  
**MIGNONETTE TREE**, how to make, 206.  
**MILDEW**, recipe for, 65.  
**MILK**, nature and properties of, 9. Removing bad smells from, 182. Quantity consumed in London, 401.  
**MILK POWDER**, how made, 247.  
**MISSOURI COUNTRY**, notice of, 95.  
**MIXTURE OF SOILS**, dissertation on, by Rev. Morrell Allen, 234.  
**MORUS MULTICAULIS**, new Chinese Mulberry, 81. 105. Cocoons produced from, 270. Notice of, 289. 357.  
**MOSSY LANDS**, remedy for, 60.  
**MOTH**, bee, best method of destroying, 248. 262.  
**MOUNTAIN ASH**, by D. T. 141.  
**MOUNTAIN RICE**, inquiry about, 89.  
**MOUNT VERNON**, the farmer of, 217.  
**MOUBRAY ON POULTRY**, notice of, 137.  
**MULBERRY**, new Chinese, *Morus Multicaulis*, 81. 105. Cocoons produced from, 276. Notice of, 289. 357.  
**MULBERRY LEAVES**, dried and powdered for silkworms, 237.  
**MUMMIES**, plants found with, 405.  
**MURIATIC ACID**, oxidated, revives seeds, 263.  
**MUSE**, Dr. Joseph E. on cheat, 58.  
**MUSHROOMS**, culture of, 20. Caution to eaters, 353. Why edible ones differ from others, 188.  
**MYRTLE**, wax-bearing, notice of, 222.

## N.

**NAMES** of vegetables, hard ones, 17.  
**NATIVE** ornamental plants, 178.  
**NETTLE**, why it stings, 143.  
**NEW ENGLAND FARMERS**, character of, 33.  
**NIGER**, extracts from a journal, 394.  
**NORTON**, Dr. D. N. on the Scuppernong grape, 132. Presents Cunningham and Woodson grapes, 257.  
**NOYEAU**, oil of, 383.  
**NYMPHEA NELUMBO**, notice of, 245.

## O.

**OAK LEAVES**, the time and manner of gathering for manure, 297.  
**OATS**, the Hopetoun, 332.  
**OFFSPRING**, apt to assume the characters of remote ancestors, 273.  
**OGDEN**, Gov. on cheat or chess, 290.  
**OILS**, fixed, observations on, 86. From sunflower seeds, 191. Of noyau, 383. Sunflower, 409.  
**OIL STONE**, specimen of, from Virginia, 137.  
**ONION BED**, a profitable one, 7.  
**ONIONS**, to preserve from sprouting, 88. Spanish, sent by P. White, 153. By the Editor, 161. White tree and potato, by the Editor, 177. On raising seed, 415.  
**OPIUM**, impropriety of its culture in the south, 137.  
**OPDELDOC**, to make liquid, 321.  
**ORCHARD GRASS**, best method of sowing, 401.  
**ORCHARDIST**, Kenrick's new American, 358.  
**ORCHARDS**, pruning, 373.  
**ORNITHOLOGY**, new fact in, by D. T. 231.  
**OUT BUILDINGS**, their construction, 363.  
**OX**, an extraordinary one, 403.  
**OXEN**, on training, 7. Anecdote of one, 49. Training, 102. Feed for, 103. Training, 207.

## P.

**PAINT**, white, without lead or oil, 207.  
**PAPER**, made from wood shavings, 72. Agricultural, a new one proposed in Lower Virginia, 243.  
**PARSNIPS**, culture and use of, in Herefordshire, 79.  
**PASCALIS**, Dr. Felix, his notice of *Traite d'Agriculture*, 39.  
**PASTURE**, for swine, 79. Impropriety of keeping land in perpetual, 203.  
**PEACHES**, price of in London, 351.  
**PEACH PITS**, saved in the fall, how to preserve and plant, 64.  
**PEACH TREES**, salt prevents insects at the roots, 71. Culture of, 110. Anomalous produce of a, 143. Effects of winter on, in the Genesee country, by D. T. 214.  
**PEAR TREES**, girdling makes prolific, 141. Diseases in, 169.  
**PEARS**, petre, presented by R. Carr, Esq. 341.

**PEAS**, new method of raising, 145. And barley, culture of, 282. New plan of sticking, 303. As a field crop, 356. Insects in, 404.  
**PEBBLE STONE FENCE**, how to make, 399.  
**PERRINE**, Henry, proposes to establish a nursery of tropical plants, 263.  
**PERSIAN TOBACCO**, samples of, received, 401.  
**PERUVIAN COTTON**, remarks on, by P. White, 153.  
**PETRE PEARS**, presented by R. Carr, Esq. 241.  
**PHYSIOLOGY**, vegetable, 357. 373.  
**PICTURE**, an old one, 337.  
**PINUS CEMBRA**, an eatable pine, notice of, 84. 187.  
**PIPPINS**, preserved, 334.  
**PLANTER'S GUIDE**, by Sir H. Stewart, notice of, 297. 313.  
**PLANTING**, from the Library of Useful Knowledge, 2. 10. 18. 43. 60. 68. 78. 83. 92. 100. 108. 116. Hexagonal, by the Editor, 9. By J. F. B. 25. By the Editor, 65. By R. R. Harden, 66. Corn, 75. Of trees, 329.  
**PLANTS**, how to protect, 49. Reviving, 71. Physiology of, 86. Tropical, 101. Physiology of, 124. Native ornamental, 173. Adapting them to soils, 324. Exotics, &c. 342. Found with mummies, 405.  
**PLASTER**, use of, on corn, 49. As manure, 51. On vegetables, 52. As manure, 67.  
**PLOUGH**, with a weed hook, by Mr. Garnett, 308. 321. Culture of corn with, 394.  
**PLOUGHING**, and hoeing, 180. Utility of frequent, 372.  
**PEONIES**, notice of, 81. 97. By An Amateur, 137.  
**PLUM**, Arkansas, plants of, received from Col. O'Fallon, 25. Fine ones, in the Genesee country, 237.  
**POISON ROOT**, remarks on, 349.  
**POMOLOGICAL MANUAL**, Prince's, notice of, 78. 81. By T. 145.  
**PONDS**, season for emptying, 182.  
**POPOSEE**, how to make, 182.  
**PORK**, New England, large, 350.  
**PORTER**, Com. describes Angora cats, 145. Sends seeds of a new ornamental tree, 145.  
**PORT WINE**, why exported in pipes, brandied, &c. 153. Quantities exported from Oporto, 407. Of the shops, composition of, 407.  
**POSTS**, last longest when set with tops down, 185.  
**POTATOES**, planted whole, 55. Culture and preservation of the sweet potato, 75. Boiling, 103. Culture of, 107. To preserve, 144. Mealy, most nutritious, 164. To save sweet, 193. Why they should be stored with the earth on, 226. Large ones, 257. Rules for preserving sweet, 258. Preparing, as food, 271. A curious one, 273. And corn, culture of, 283. Great produce of, 291. To cut, for planting, 292. Culture of, 300. The largest, 300. Great produce of one, 341. Large sweet, 341. A large one, 353. Large produce of three, 378. 380. Premium crops of, 395. Raising, to sell or having to buy, 355. Great produce of, 398. 403.  
**POULTRY**, Moubayon, 137. Rearing in Mexico, by H. Perrine, 262. Fed on boiled potatoes, &c. 334.  
**PRAIRIES**, floral beauty of the, 342.  
**FRANGOS HAY PLANT**, account of, 259.  
**PRATT**, J. and M. on corn planting, 9.  
**PREMIUM**, offered for proof of the transmutation of wheat to cheat, 244.  
**PRIMROSE**, dwarf white evening, 137.  
**PRINCE**, Wm. on the reciprocal influence of the stock and its graft, 261.  
**PRINCE**, Wm. & Sons, on dahlias, 281.  
**PRIZE CATTLE**, in England, 15.  
**PRIZE ESSAY**, second, on rural economy, by N. Herbamont, 21. Third, on horticulture, by Calvin, 54.  
**PROFIT**, and expense of farming, 341.  
**PROTECTING PLANTS**, from insects, 49.  
**PRUNING**, trees, 13. Orchards, 373.  
**PUDDING**, sweet apple, how to make, 334. Sweet potato, poetical receipt for, 401.  
**PUMPKIN VINE**, a productive one, 7.  
**PUMPKINS**, mammoth, a new kind, 241.  
**PUMPKIN PIES**, how to make, 350.  
**PUTTY**, solvent for, 128.  
**PYROLA**, notice of, 129.  
**PYRUS MALUS BRENTFORDIENSIS**, a new and splendid book, 89.

## Q.

**QUINOA**, (chenopodium,) a new and delicious spinach, 89. Remarks on, 349.

## R.

**RADISHES**, culture of, 181. Why considered wholesome, 262.  
**RAIL ROAD**, Baltimore and Ohio, report of, 278.  
**RAIL ROAD JOURNAL**, notice of, 201.  
**RAPP**, Frederick, conversations with, on his silk establishment, 265.  
**RARE**, or rose tree seed, sent by Com. Porter, 145. Remarks on, by S. Feast, 169.  
**RATS**, chloride of lime a remedy for, 86.  
**RAZOR**, method of fine edging, 79.  
**READ**, W. G. on the culture of cow peas, 229.  
**REMOVAL**, of the Farmer office, 241.  
**REVIVING PLANTS**, by spirits of camphor, 71.  
**RHODODENDRON PONTICUM**, notice of, 81.  
**RHUBARB**, culture and value of in diseases of the bowels, by G. B. Smith, 179. 193. Culture of, 197. Culture of, 382. 390. 396. 404.  
**RHYME**, good, but bad reasoning, 113.  
**RICE**, why kept in large piles, 215. Culture of, 258. 268. Russian, 300. Culture of, 346. Machine for cleaning, 358. Lands, rotation in, 371.  
**ROBBING GARDENS**, notice of, 17.  
**ROBERTSON**, John C. on blind stagers, 191.  
**ROOKERY**, South Sea, account of, 351.  
**ROSE BUG**, will not prey upon native grapes, 9.  
**ROT**, in sheep, 54.  
**ROTATION**, of crops, 244. In rice lands, 371.  
**ROWAN**, Thomas, on cheat, 4.  
**RUFFIN**, E. his Treatise on Calcareous Manures, 113. On lime, as a manure, 266. On marl, 331.  
**RUSK**, to make fine, 393.  
**RUST**, in cotton, 378.  
**RUTA BAGA**, its successful culture in Georgia, 9. Culture of, 10. By J. B. 42. By J. W. M. 323. By Sidney Weller, 354.  
**RYE**, vitiated, pernicious effects of, 254.

## S.

**SALT**, Liverpool, improper for butter, 38. That of Syracuse, N. Y. very fine, 49. Prevents insects in peach trees, 71. Used as manure, 124. For cattle, 233.  
**SALT**, Kanawha alum, manufacture of, 271. By C. W. Johnson, 314. 322.  
**SALT MARSH**, the various uses to which it may be applied, 74.  
**SAND CHERRY**, plants of, received from Col. O'Fallon, 25.  
**SAW DUST**, used as food for hogs, by the Shakers, 257.  
**SCUPPERNONG GRAPE**, 129. Description and drawing of, 132. And wine, remarks on, 345.  
**SEASON**, in New York and Maryland, 303.  
**SEED CORN**, steeping in copperas water, &c. 59.  
**SEED WHEAT**, preparation of, 300.  
**SEEDS**, long vitality of, 140. To restore the germinating powers of, 141. Why do they grow in sand, &c. 215. Fall, sowing of carrot, parsnip, &c. 222. To make old ones grow, 263. Of trees, &c. when to sow, 289. Germination of, 294. Of ancient plants found with mummies, 405.  
**SHEEP**, instinct in, 25. Diseases in, 31. 39. A prolific one, 33. Poisoned, 40. Rot in, 54. Letter from Wm. Jarvis, 106. Shearing, 126. Shepherd's Manual, 132. And wool, improvement of, by R. K. M. 138. Shepherd's Manual, 141. 148. 157. 166. 174. Improvement of, by R. K. M. 194. And shepherds in France, 198. Improvement of by R. K. Meade, 245. And swine, report of the Brighton show, 275. A large one, 353. An immense one from Switzerland, 353. Exhibition of, proposed, 369. 377. 402. 403.  
**SHEPHERDIA CANADENSIS**, notice of, 373.  
**SHEPHERD'S MANUAL**, on the management of sheep, 132. 141. 148. 157. 166. 174.  
**SHORTHORNS**, new importation of, by Wm. Jackson, 229.  
**SILK**, proceedings of the New York legislature on, 17. Raising and manufacturing, 79. Sewing, 134. Culture of, by J. T. Barclay, 165. Domestic manufacture, error corrected, 193. Specimen of domestic, 244. Practicability of cultivating, and conversation with Mr. Rapp on, 265. In Massachusetts, 294. From Indiana, 313. Remarks on, with notices, and modes of constructing mounting frames, 337. Filatures, 353. Experiments in, 369. Culture of, at Lowell, 385.

**SILK GRASS**, notice of, 108.

**SILK WORKS**, Dedham, letter from J. H. Cobb on, 237.  
**SILKWORMS**, an error corrected relative to, 81. Experiment with the Chinese, by Dr. James Mease, 180. Two crops of, raised by Mrs. Parmentier, 229. On feeding with preserved leaves, 237. Native, notice of—two broods of, by Mrs. Parmentier, 270. In open air, 332.  
**SINCLAIR**, Robert, presents Catawba grapes, 241. On the culture of asparagus, 385. On the vine, 396.  
**SINCLAIR AND MOORE**, on Buffalo berry and Arkansas plum, 327.  
**SISAL HEMP**, reward for a machine for cleaning, 263.  
**SKELETONS**, of leaves and flowers, 25.  
**SLUGS**, method of destroying, 127.  
**SMITH**, Mrs. Elizabeth, consort of the Editor of the American Farmer, obituary notice of her death, 161.  
**SMITH**, Gideon B. on the culture of Rhubarb, 177. Of the tulip, 357.  
**SMITHFIELD**, cattle show, description of, 94.  
**SMUT**, cause of, in wheat, 412.  
**SNAKE BITES**, treatment of, by Dr. R. R. Harden, 46.  
**SNOW**, in Virginia, 281.  
**SOAP**, recipe for good, 383.  
**SOAPSUDS**, an antidote for insects, 205.  
**SOILS**, light arable, may be too much pulverized, 33. Fertility, classification, analysis of, &c. by Professor Eaton, 210. Mixture of, by Rev. M. Allen, 234. Adapting plants to, 324. Analysis of, 348. Adapting crops to, 364.  
**SOUTH SEA ROOKERY**, account of, 351.  
**SOWING** grass seed, 27.  
**SPARKS**, Jared, on Washington's agricultural papers, 217.  
**SPINAGE**, new and delicious, 89.  
**SPOFFORD**, Dr. his essay on irrigation, 156.  
**SPRING**, lines on, by Barry Cornwall, 335.  
**SPURRED RYE**, ergot, caution against, 361.  
**SQUASHES**, winter, how to raise, 21.  
**STAGGERS**, blind, in hogs and horses, 134.  
**STEER**, a large one in Boston, 86.  
**STILTON CHEESE**, how to make, 86.  
**STING** of the bee, cure for, 199.  
**STOCK**, exhibition of, proposed, 377. Imported, remarks on, by John Welles, 111.  
**STOCK AND GRAFT**, on their reciprocal influence, by Dr. James Mease, 259. By Wm. Prince, 261.  
**STONE PINE**, notice of, 197.  
**STOVES**, best method of cleaning, 334.  
**STRANGLES**, and yellow water, 303.  
**STRAW**, useful in making manure, 60.  
**STRAWBERRIES**, description of varieties, from Prince's Pomological Manual, 28. 36. And raspberries, plentiful in Baltimore, 49. Season of setting out, 62. Preserving, 63. Early in New York market, 111. In autumn, by the Editor, 217. 233. Not diacious, 273. Culture of, 278. Memoir on, 292. In November, 321.  
**STRENGTH**, of timber, relative, 49.
